

Energy Conservation and Environmental Stewardship Policy

3210 | Energy Conservation and Environmental Stewardship Policy

Date Approved:

Date Amended: December 13 2022

POLICY

Responsible consumption, mindful energy management and a commitment to environmental stewardship are the joint responsibility of trustees, district employees, and students.

A commitment to energy conservation and sustainability will achieve reductions in:

- greenhouse gas emissions; and
- the environmental impact of district operations.

The Board is committed to the continuous improvement of the district's energy management performance and to building a culture of sustainability and environmental stewardship.

The Board encourages and supports the development and implementation of effective energy awareness activities, curriculum, training, and programs to create a district and community-wide culture of conservation.
