

Student Support Policy

1130 | Student Support Policy

Date Approved: October 08 2013

Date Amended: October 11 2016

RATIONALE

The Board of Education is committed to providing all students with an education program that best suits their needs and enables them to achieve their maximum potential in a safe, caring and welcoming environment. The Board supports an inclusive education system in which all students are fully participating members in a community of learners.

POLICY

The Board believes that the unique needs of individuals and the challenges of a small, remote school district should be taken into account when providing support services to students. The Board supports engaging, inclusive and culturally relevant education for all students within the Response to Instruction and the Universal Instructional Design Frameworks. Where additional services and support for students are needed, decisions are made in consultation with parents, students (when appropriate) and members of the community based team.

Culturally relevant programs and services provide the foundation for healthy students and communities. The Response to Instruction Framework incorporates a flexible continuum of school-wide strategies for all students, targeted supports for students with specific challenges, and intensive supports for students with persistent challenges.

The Universal Instructional Design Framework brings together many school district initiatives to provide multiple avenues of access to curriculum, instruction, and assessment. Services and support focus on multiple pathways to success and multiple ways of defining success.

Within the Response to Instruction and Universal Instructional Design Frameworks students receive maximum benefit from their education program, in accordance with the objectives of Provincial curricula, school district programs, and Board approved school programs.
